

191—4.10(17A) Exemptions from public rule-making procedures.

4.10(1) To the extent the insurance division for good cause finds that public notice and participation are unnecessary, impracticable or contrary to the public interest in the process of adopting a particular rule, the division may adopt that rule without publishing advance Notice of Intended Action in the Iowa Administrative Bulletin and without providing for written or oral public submissions prior to its adoption. The division shall incorporate the required finding and a brief statement of its supporting reasons in each rule adopted in reliance upon this subrule.

4.10(2) The insurance division may, at any time, commence a standard rule-making proceeding for the adoption of a rule that is identical or similar to a rule it adopts in reliance upon subrule 4.10(1).
